Skills

Mobile

Swift, SwiftUI, UIKit, WatchKit, React Native, TypeScript, Flutter, Kotlin, Java

Architecture

MVVM, Repository Pattern, Clean Swift/VIP, Modular Architecture, Native Modules, Multi-tenant Applications

Security

Biometric Auth, HMAC, SSL Pinning concepts, Secure Storage, Push Notifications, Deep Linking

Platform & Delivery

Firebase, Dynatrace, Build Automation, Node.js, Ruby, Jira

Current Focus

Software Architecture, Microservices, Docker, Kubernetes, Accessibility

Certifications

Cambridge PET, Level B1

Aug 2024

Education & Training

Links Academy 2018 - 2019

Mobile and Web Applications Developer

I.T. Michele Laporta 2019

Diploma in Computer Science and Accounting

Languages

English

Intermediate / Upper-intermediate, B1 certified

Italian

Native

Summary

Senior Mobile Developer with 6+ years of experience delivering fintech mobile applications across iOS, React Native, Flutter and native Android integrations. Specialized in secure banking platforms, multi-tenant mobile systems, wearable applications and accessibility-aware development. Worked on mobile banking products deployed across 31+ banking institutions, contributing to feature delivery, technical evolution, native integrations, rollout activities and junior developer guidance.

Experience

Links Management and Technology S.p.A.

Lecce, Italy

Senior Mobile Developer

Jul 2025 - Present

- Develop fintech mobile banking features across React Native, Swift and Kotlin/Java components.
- Designed and developed a SwiftUI Apple Watch companion app with an autonomous API layer, improving wearable banking interactions.
- Build and integrate platform-specific native components for React Native banking applications.
- Guide junior developers and contribute to technical decisions, implementation planning and code quality.

Mobile Developer

Oct 2019 - Jun 2025

- Developed features for a multi-tenant mobile banking platform deployed across 31+ banking institutions.
- Delivered native iOS banking features using Swift/UIKit across legacy and modern codebases.
- Contributed to the technological evolution of retail mobile banking apps, including React Native adoption, UX/UI improvements and accessibility adaptations.
- Supported multi-bank rollout activities, including bank-specific assets, build parameters, Firebase configuration, versioning and release support.
- Maintain build automation and release workflows using Fastlane and Node.js.
- Contributed to a banking app migration from NativeScript to Flutter, working across Flutter/Dart and native Swift/Kotlin integrations.
- Implemented security-sensitive banking flows including biometric authentication, secure networking, HMAC-based communication, push notifications and deep linking.
